## BARRY CONTROLS 93880 SERIES PT-6 ENGINE ISOLATORS

### PWC PT-6 Engine Isolator Support

*AEK Technology is equipped to support your requirements for most PT-6 engine installations using Barry Controls 93880 series engine isolators and isolator components, including factory new and factory rebuilt parts. Our sales staff can match your aircraft and 93880 dash number to our stock.*

**Barry Controls' 93880 Series Engine Vibration Isolator is one of the most popular mounts used for PT-6 engine installations throughout the world. See the following list for your aircraft type part number.**

**AEK has the largest inventory of PT6 engine vibration isolators in stock and carries other Barry Controls engine isolators and isolator components for piston, turboprop and jet aircraft.**

**We also stock factory rebuilt isolators and factory new isolator components for field overhauls and rebuilds.**

AEK Technology also stocks many of the AN, MS and NAS hardware items used in aerospace and defense applications such as fasteners, fittings and avionics box to tray retainers.

Partial list of aircraft using 93880 series isolators:

Air Illinois Jetstream Conversion; Air Tractor AT503, AT801; Ayers Turbo Thrush; Basler Turbo DC-3; Beech RC-12K, 1900, Super King Air 300, 350, T6-Texan II; Brit Aero Jetstream 31 Conversion; Conair Turbo Firecat S-2; Dornier DO72; Ernie Hawk; Fairchild Metro III; NewCal Caribou Conversion DHC-4; Phoenix Aero DC-3 Conversion; Pilatus PC-9, -12; PZL Turbo Orlik 130T; Schafer DC-3 Conversion; Short SD3-60 200, 300

**TYPICAL 93880 ENGINE ISOLATOR**
